

### ALDGATE TIME LINE

1. All References are to document identification references on Lextranet save for references to the London Assembly Report which is indicated by LA / volume number / page number.
2. The timings are taken from the documents disclosed by the various organisational Interested Persons. It appears likely that the clocks used by the different organisations were not all set to precisely the same time; this may have caused some discrepancies in the chronology.

| Time    | Event  | Reference                           |
|---------|--|-------------------------------------|
| 0847:38 | BTP receive call from London Underground at Liverpool Street stating <i>"We've had a loud bang on the platform we've got some at the moment it Liverpool Street underground here we are evacuating...it looks like its platforms 1 and 2 on the Metropolitan Line"</i> . | BTP00000167-001                     |
